

# Something New – Something Different

## He's GREY & He's MONKEY BONES

A new era in the Trotting Sire Ranks begins.  
The latest and most modern bloodlines in the world.  
This sire line is the most sought after sire line in North  
America today.

It started with

**GARLAND LOBELL** who sired five full brothers,  
**Conway Hall** (1995) \$15,000 S/Fee  
**Angus Hall** (1996) \$15,000 S/Fee  
**Andover Hall** (1999) \$30,000 S/Fee  
**Adams Hall** (2001) who is racing and  
serving mares in Sweden at \$7,500.

**MONKEY BONES** (Andover Hall) is the sire for the  
serious breeder who considers the sire line when  
determining a suitable stallion for their mare.

As **MONKEY BONES** is a grey, he also brings  
with him a degree of uniqueness for the breeder  
looking for something different. Something  
different to stand out at the yearling sales, and  
also on the track.

**MONKEY BONES** passed his fertility test  
in America with flying colours. The vet who  
completed the test gave him the big tick  
of approval and said the he has a great  
temperament and in the breeding shed he is a  
well behaved and tremendous horse who did  
everything right.

**MONKEY BONES** is of medium size (15.2) and  
is a very long barrelled individual.

## Dare to be UNIQUE?
